

EuroScholars: The Importance of Undergraduate Research Abroad

Austin Auyeung (University of Western Ontario / Leiden University, AY 2017-2018): *“Participation in the program, helped me strengthen my application to gain acceptance to medical school. Being fully immersed in research was a great experience especially coming from predominantly lecture learning and appreciating the differences”.*

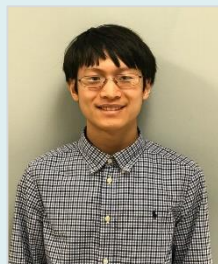

Girard Bucello IV (University of Mary Washington / University of Geneva, F2014): *“EuroScholars allowed me to gain research experience as an undergraduate that made me a more competitive applicant for graduate programs, and almost certainly played a significant role in my being able to graduate with an MSc from the London School of Economics”.*

Emily Woods (Rhodes College / University of Zurich, F2010): *“Being able to spend a full semester doing research as part of the EuroScholars program helped to solidify my choice to pursue an MD/PhD dual degree because it gave me the opportunity to see how much I enjoyed research and working with other scientists”.*

Xiaoqi Yu (Gustavus Adolphus College / LMU, S2018): *“I gained very valuable research experience at Munich, a good letter of recommendation, also a solid work to present when I applied for physics PhD programs”.*

Richard Wu (University of Texas – Dallas / KU Leuven, F2018): *“Getting the opportunity to conduct research abroad on a topic not available at my home university”.*

Lauren Winogron (Senior Program Manager, Rutgers, The State University of New Jersey): *“I think research abroad is a great opportunity for advanced undergraduate students! The opportunity to be published as an undergrad is equally amazing”.*

Dr. Michiel de Dood (Associate professor, Leiden University): *“Experience the important differences in education and research between US and other countries. Opportunity to be immersed in a research environment early in a student's career can be a great motivation for further personal development”.*

Fast Facts / Program Details

- Geared towards bright and independent **undergraduate** students with strong interest in research: **3.4 GPA or higher** required
- **Intensive, research-oriented** semester or academic year at one of 5 prestigious universities in Europe
- **Transfer of academic credits.** Earn up to 30 ECTS / equivalent to 15 US credits per semester. Each semester of study is considered full-time study.
- All research and deliverables are conducted in English
- Projects are available in **all disciplines**: STEM fields, humanities, social sciences, business & finance, etc.
- Culture a/o Language course provided at each university
- Midstay programme: allows students to network, and present their research findings to date.
- Student facilities at host university.
- Supervision of the research project.
- 1 elective course (if applicable)

Application deadlines: 1 April and 1 October

Representative office in North America:
International Studies Abroad (ISA)
