

# 'Sense of Home' and Nursing Home Residents

Isabella Wurtz
University of Utah

### About Me

- Home Uni: University of Utah
  - Bachelors of Science in Psychology
  - Mathematics Minor
- Host Uni: KULeuven
  - MeRel Lab: ExiDep project
- Futur e Goal s:
  - Obtain a Masters of Statistics
  - Career in Quantitative Research in Psychology
- Why Eur oSchol ars?
  - Opportunity to grow knowledge and skills in research
  - Collaborate with the broader community of psychology researchers outside of the U.S.A.

# Backgr ound

#### o Existential Psychodynamics

• The *existential position* of psychodynamics emphasizing the basic conflict that flows from the individual's confrontation with the *ultimate concerns* of existence (Yalom, 1980, p. 7-8).

#### o Four Utimate Concerns

- Death
- Freedom
- Isolation
- Meaninglessness

## **Background**

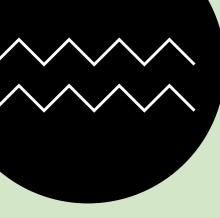

#### o Meaning In Life

- 3 components
  - Coherence
  - Purpose
  - Existential Mattering (Costin, 2021, p. 2)

#### o 'Sense of Home'

- Multidimensional
  - Built Environment
  - Psychological aspects
  - Social aspects

(Rijnaard et al., 2016, p. 2-3)

# My Research

The aim of my project is to determine if there is a relationship between 'sense of home' and depressed feelings in NH residents

+

determine if this association can be mediated by the experience of meaning in life.

# Data Collection and Results

 The ExiDep project is a three-year longitudinal study conducting interviews with nursing home residents using psychometric scales.

• I am currently analyzing crosssectional data collected last year for the ExiDep project.

• Due to the project timeline agreed upon with my supervisor, I do not have results to show at this time.
