

Research Abroad at a Top European Research University

The banner features the EuroScholars logo on the left, which consists of a white circle containing a red square, a blue square, and a green square. To the right of the logo, the text reads "UNDERGRADUATE RESEARCH with the EuroScholars Program". Below this, it says "STUDY IN EUROPE" followed by "9 TOP RESEARCH UNIVERSITIES IN 6 COUNTRIES". At the bottom left, there is a logo for "with isa".

A photograph showing three students sitting on wooden steps. One student is using a laptop, another is reading a book, and a third is looking at a tablet. There are books and a bag scattered around them.

University in the spotlight: University of Heidelberg

Situated in one of Germany's most beautiful cities, Heidelberg University is Germany's oldest university and an important center of modern research and teaching. With over 160 study programs, Heidelberg offers a range of subject combinations nearly unparalleled in Germany, thus creating a perfect setting for individualized and interdisciplinary studies. From its very beginnings in the year 1386, the University has welcomed and profited from

the international perspective students and scholars from abroad bring to its academic and cultural life. Today, Heidelberg University is tied into a worldwide network of research and teaching collaborations and has a distinctly international profile.

The University's international prominence is also reflected in its student population: around 18 percent of Heidelberg's close to 30,000 students and around a third of the enrolled doctoral candidates come from abroad.

Dialogue Beyond Traditional Disciplinary Boundaries

The University places special emphasis on initiating and maintaining a dialogue across traditional subject boundaries and developing new forms of interdisciplinary cooperation. The following are four of Heidelberg University's outstanding research areas, the so-called Fields of Focus (FoF):

[FoF 1: Molecular and cellular basis of life](#)

[FoF 2: Structure and pattern formation in the material world](#)

[FoF 3: Cultural dynamics in globalised worlds](#)

[Field of Focus 4: Self-regulation and regulation: individuals and organisations](#)

The two clusters of excellence "Asia and Europe in a Global Context" and "Cellular Networks" represent additional research foci.

Another strength of Heidelberg University lies in its numerous collaborations and alliances with non-university research institutions such as the German Cancer Research Center or the European Molecular Biology Laboratory. These institutions, working alongside the university, form an internationally competitive research network, providing a wide assortment of contact and cooperation possibilities for Heidelberg University researchers and students.

Studying and Living in a Cosmopolitan Atmosphere

Heidelberg's cosmopolitan and student-friendly atmosphere is one of the city's distinguishing characteristics. Heidelberg is a lively centre of the Rhine-Neckar metropolitan region and is marked by its high density of research-intensive industry and conglomeration of scientific research institutions. These institutions, working alongside the university, form an internationally competitive research network, providing a wide assortment of contact and cooperation possibilities for Heidelberg University researchers and students.

Both the city and the university offer a huge variety of sports and leisure activities, as well as numerous theatres, renowned film and music festivals and a large number of museums, creating a sophisticated and diverse cultural atmosphere. Popular sights include the world-famous Heidelberg Castle, the historic streets and alleys in the old city and the Philosopher's Path, one of the most beautiful mountain hiking trails in Europe. For more information on studying in Heidelberg please see the following page:
